k-con®

Kooltech Bespoke Solutions

KS9-BSI-A

Room Temperature Sensor

K-con offer a remote temperature sensor designed to be a discreet means of providing accurate temperature readings. Ideal for use in hotel and residential applications where aesthetics are an important consideration.

Key Features:

- Low profile for discreet installation.
- Can be painted to blend into surroundings.
- Optimum room temperature control without the need for an unsightly box on the wall.
- Fully approved by Mitsubishi Electric UK Living Environmental Systems for control.

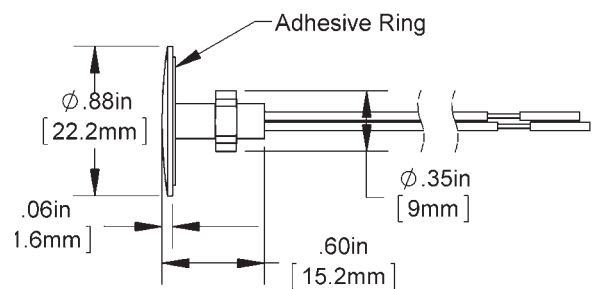

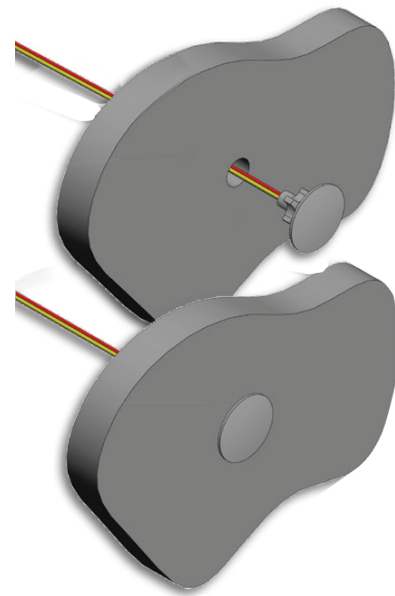

Extremely discrete room temperature sensing

Actual size

Working together delivering innovation and excellence

The K-con Remote Temperature Sensor offers optimum room temperature control without the need for an unsightly box on the wall.

Tested and proven in the field the sensor is designed to be extremely discreet, virtually disappearing into walls and ceilings. The sensor itself is suspended in a round enclosure which allows room air to surround it. Isolated from the mass wall temperature with internal insulators it enables a fast and accurate temperature reading.

Supplied with 10m of two core cable and fixings for connecting to Mitsubishi Electric indoor units.

Fitting the Remote Temperature Sensor fits in a wall space
